

MOVING & HANDLING Revolving Transfer Platform

Code 800 Orbital Seater

The Orbital Seater has been designed to help transfer a person from one seated position to another. Furthermore, it reduces the physical strains placed on carers by providing an ergonomically correct working position. Manufactured from high tensile steel, the unit is very manoeuvrable (fitted with 2 x 100mm dia rubber castors), and provides a tilt free, secure turntable platform.

The hand operated locking device enables the platform to turn and lock in 5 separate positions. This enables the carer to rotate to any required position, at the same time controlling the turning speed.

Dimensions:-

Width between arms:	17" (430mm)
Height of front handles from platform base:	30" (760mm)
Height of top bar from platform base:	39" (990mm)
Width"	26" (660mm)
Depth:	27" (685mm)
Disc diameter:	18" (450mm)
Product weight:	17Kg
Recommended user weight:	35 Stone (222Kg)
