

PERCHING / KITCHEN / SHOWER STOOLS

A range of practical, heavy duty stools manufactured in preferred high grade tensile steel, with a tough peel-resistant plastic coating. All models have front to back bracing struts for additional strength.

The range incorporates NEW P.U. MOULDED COMPONENTS which include ergonomically designed robust seats which are non-slip in a water environment, fire retardant, hygienic and suitable for cleaning in industrial / commercial washing machines.

The seats, arms and component backs contain hygienilac which makes them RESISTANT TO MRSA AND OTHER MICROBIOLOGICAL CONTAMINANTS.

Code 501T
Fixed height 24"
(610mm) at front

Code 501S
Fixed height 21"
(530mm) at front

Code 502
Adjustable height
